Poti Office

In order to optimize cargo flows via Black Sea «Silvirom OÜ» began to use port Poti as from March 2016. With the purpose to ensure effective cargo handling and supply the whole scope of intermodal transport service in North Caucasus the company «Silvirom OÜ» Silvirom OÜ has opened own branch office in Poti. Silvirom OÜ carries out shipments of containers, oversized cargo on the railcars of different types and modifications, shipments of bulk cargo and cargo in parcels in covered wagons of all modifications and in semi-wagons, warehousing and other services for multimodal shipments from «Deep Sea» and «Short Sea», destined to the regions of CIS countries and Mongolia via Black Sea.

With the beginning Russia's invasion to Ukraine we decided to focus our logistical activities on the Trans-Caspian Transport Corridor which allows to avoid transit via territories of RF and Belorus being efficient route, connecting Europe and Central Asia.

This Corridor will meet significant investments from EU in the nearest time aiming to improve service and transit time. Please follow the link: [Investors Forum for EU-Central Asia Transport Connectivity \(europa.eu\)](https://europa.eu/InvestorsForum)
